You feel like you can hear the finger presses against a Roland in the left and right channels, evenly distributed. John and Roy treat a gardener suffering from tetanus, a driver of an ice cream truck trapped after a wreck stuck under live power lines, a girl who has overdosed on barbiturates and later dies, and a pilot of a glider who crashed, and they also free a man trapped under his house.

The fully equipped TV studio always has big queues, too, as, more perplexingly, does the car-rental office. The thickness—or viscosity—of an oil is hugely important to how effectively it does its job, and your engine was designed around a specific viscosity. Because there is more at stake than a paycheck.
