It is not that these countries, so rich in species, do not by a strange chance possess the aboriginal stocks of any useful plants, but that the native plants have not been improved by continued selection up to a standard of perfection comparable with that given to the plants in countries anciently civilised. Note: This review is republished from my official website. In terms of their contribution to human depopulation, germs should clearly precede both guns and steel in the book's Critical Summary of Guns.

Hemakesasimilarbaldassertiontowardsthefrontofthebookabouttheprevalenceofagriculture. Jared Diamond is not much into referencing materials which is strange given that he is an academic. Guns, Germs, and Steel argues that cities require an ample supply of food, and thus are dependent on agriculture.

Welltoldtale. Apr22, PhilipAllanrateditreallylikedit. These larger societies, by their very nature, could and inevitably did evolve job specialization and a hierarchy of government. As a result of those food surpluses, population densities of societies relying on food production are typically ten to a hundred times greater than those of societies relying on hunting and gathering.
